*The purpose of this study is the Influence of Career Development, Organizational Culture and Self Efficacy on Employee Performance of PT Matahari Department Store Tbk. The design of this study uses a quantitative approach with an associative approach. The results of this study show that with multiple linear analysis, a constant value of 1.063 is obtained, which means that if Career Development, Organizational Culture and Self Efficacy do not change or are almost close to 0, then the employee performance created is 1.063 and the result does not change. From the results of the t-test of the Career Development variable on Employee Performance, the value of  $T_{count}$  (2.599) >  $T_{table}$  (2.012) was obtained, the results of the t-test of the Organizational Culture variable on Employee Performance were obtained  $T_{count}$  (2.989) >  $t_{table}$  (2.012), so that it can be stated that the variables of Career Development, Organizational Culture and Self Efficacy have an influence on Employee Performance. The results of the significant test were obtained a correlation value of Career Development 0.000, Organizational Culture 0.000, Self-Efficacy 0.000 which means that the influence of these variables is very strong and after analysis using the determination coefficient analysis ( $R^2$ ) a result of 0.925 (92%) was obtained so that it can be concluded that the variables Career Development, Organizational Culture and Self Efficacy have an effect of 92% on Employee Performance while the remaining 18% is influenced by other factors outside the variables of Career Development, Organizational Culture and Self Efficacy on Employee Performance.*
